

Site walkthrough - April

Classification: Internal

Author: Facilities

Date: 30 April

1. Purpose of the visit

The quarterly walkthrough was completed on schedule. The visiting team were shown the loading bays, the goods lift and the adjacent car park. Lighting in the east corridor remains uneven and a replacement order has been raised.

The team also reviewed the fire drill record for the quarter and were satisfied that the last evacuation completed within the target time. The muster point signage is to be refreshed before the summer.

No further action is required from this visit beyond the lighting order already raised.
